

Syllabus

Module title:	Applied pharmacology of farm animals	ECTS	1
Polish translation:	Farmakologia stosowana – zwierzęta gospodarskie i konie		
Course:	Veterinary Medicine		

Module language:	English	Stage: JM-FVM		
Form of studies:	<input checked="" type="checkbox"/> intramural <input type="checkbox"/> extramural	Type of module:	<input type="checkbox"/> basic <input checked="" type="checkbox"/> directional	<input type="checkbox"/> mandatory <input checked="" type="checkbox"/> elective
		Semester: 10	<input type="checkbox"/> winter semester <input checked="" type="checkbox"/> summer semester	
		Academic year: 2023/2024	Catalogue number:	FVM-V-JMSS-10S-ED10_23

Module coordinator:	dr n. wet. Wojciech Karlik		
Teachers responsible for the module:	Academic teachers of the Institute of veterinary medicine; Department of preclinical sciences. PhD students in accordance to the internal legal acts; visiting professors; other specialists in the field of study		
Unit responsible for the module:	IVM, Department of Preclinical Sciences		
Faculty in charge:	Faculty of Veterinary Medicine		
Objectives of the module:	<p>To familiarize students with clinical pharmacology and principles of pharmacotherapy of selected disease occurring in farm animals and horses, based on veterinary medicinal products currently authorized in UE. Familiarization with the current list of authorized medicines. An indication of the limitations of pharmacotherapy resulting from the shape of the pharmaceutical market, loss of drug activity, interactions. Indication of differences in practical use between authorized formulations with the same active substance. Possibilities and restrictions with the extra-label use of drugs.</p> <p>Course topics</p> <ol style="list-style-type: none"> 1. European Monitoring Program for Microbial Resistance [2 hours] 2. Principles of practical chemotherapy in cattle [2 hours] 3. Principles of practical chemotherapy for mastitis in cattle [2 hours] 4. Principles of practical chemotherapy in horses [2 hours] 5. Principles of practical chemotherapy in poultry [2 hours] 6. Principles of practical chemotherapy in pigs [2 hours] 7. Pharmacotherapy of selected cardiovascular, digestive and respiratory diseases in horses [2 hours] 8. Colloquium [1 hour] 		
Teaching forms, number of hours:	Lectures; hours 15;		
Teaching methods:	<p>Lecture with increased teacher-student interaction.</p> <p>Consultation - 1 hour / week</p> <p>Detailed schedule will be defined by the coordinator of the course at the beginning of semester.</p> <p>Detailed organization of consultations will be defined by the coordinator of the course at the beginning of semester.</p>		
Formal prerequisites and initial requirements:	Subjects with which the student must have a positive assessment: veterinary pharmacology		
Learning outcomes:	<p>Knowledge:</p> <p>01 / student knows approved veterinary medicinal products for use in farm animals,</p> <p>02 / student knows and understands the practical principles of drug selection in given clinical symptom and disease units in farm animals</p> <p>03 / student knows and understands the practical principles of using chemotherapeutic in farm animals</p> <p>04 / student knows the principles of combining drugs in combination therapy in selected disease in farm animals</p>	<p>Skills:</p> <p>05 / student is able to explain the differences, and critically assess the effectiveness of therapy conducted with different drugs with the same basic effect</p> <p>06 / student can assess the benefits and risks of therapy</p> <p>07 / student has the ability to critically evaluate the proposed therapeutic solutions</p> <p>08 / student correctly assesses the importance of the selected medicinal product in the planned therapy</p>	<p>Competences:</p> <p>09 / from available, approved veterinary medicinal products selects products for therapy in a responsible manner</p> <p>10 / in the selection of a medicinal product is primarily guided by the well-being of the patient</p> <p>11 / student supplements knowledge in the field of new medicinal products,</p> <p>12 / student selects the medicinal product based on reliable knowledge</p> <p>13 / student is aware of the effects of decisions taken regarding the selection of the medicinal product</p>

Assessment methods:	Written colloquium, which consists of 10 descriptive questions. A total of 100 percentage points can be obtained from the test, where 100% is the sum of points to be obtained from individual questions. Two deadlines of colloquium are foreseen, carried out in the same form. No extra assessment methods are anticipated. In case of unforeseen, unusual circumstances mandatory remote teaching and remote assessment methods might be adopted.													
Formal documentation of learning outcomes:	eHMS entry. Records collected in the course portfolio i.e. individual records of student results, presence lists, database of written questions, written assessments of the students.													
Elements impelling final grade:	The final grade entered into the eHMS protocol is calculated based on the result of the written colloquium. Points obtained during the colloquium are converted into grades on the following scale:													
	<table border="1"> <thead> <tr> <th>Points</th> <th>Grade</th> </tr> </thead> <tbody> <tr> <td><0-50)</td> <td>2</td> </tr> <tr> <td><50-65></td> <td>3</td> </tr> <tr> <td>(65-70></td> <td>3,5</td> </tr> <tr> <td>(70-85></td> <td>4</td> </tr> <tr> <td>(85-90></td> <td>4,5</td> </tr> <tr> <td>(90-100></td> <td>5</td> </tr> </tbody> </table>	Points	Grade	<0-50)	2	<50-65>	3	(65-70>	3,5	(70-85>	4	(85-90>	4,5	(90-100>
Points	Grade													
<0-50)	2													
<50-65>	3													
(65-70>	3,5													
(70-85>	4													
(85-90>	4,5													
(90-100>	5													
Teaching base:	Lecture halls SGGW													
Mandatory and supportive materials :	(1) List of authorized medicines (2) Relevant scientific publications, including those of the module coordinator.													
ANNOTATIONS														

Quantitative summary of the module:

Estimated number of work hours per student (contact and self-study) essential to achieve presumed learning outcomes of the module - base for quantifying ECTS:	25 h
Total ECTS points, accumulated by students during contact learning:	0,5 ECTS

Learning outcomes of the module relative to the learning outcomes of the subject:

Outcome category	Learning outcomes:	Learning outcomes relative to the course outcomes	Impact on the course outcomes
Knowledge -	01 / student knows approved veterinary medicinal products for use in farm animals,	A.W.16, A.W.17	3
Knowledge -	02 / student knows and understands the practical principles of drug selection in given clinical symptom and disease units in farm animals	B.W.3	3
Knowledge -	03 / student knows and understands the practical principles of using chemotherapeutic in farm animals	B.W.3	3
Knowledge -	04 / student knows the principles of combining drugs in combination therapy in selected disease in farm animals	B.W.3	3
Skills -	05 / student is able to explain the differences, and critically assess the effectiveness of therapy conducted with different drugs with the same basic effect	B.U.9, B.U.13	1
Skills -	06 / student can assess the benefits and risks of therapy	B.U.9, B.U.13	1
Skills -	07 / student has the ability to critically evaluate the proposed therapeutic solutions	B.U.9, B.U.13	1
Skills -	08 / student correctly assesses the importance of the selected medicinal product in the planned therapy	B.U.9, B.U.10, B.U.13	1
Competences -	09 / from available, approved veterinary medicinal products selects products for therapy in a responsible manner	KS.1	1

Competences -	10 / in the selection of a medicinal product is primarily guided by the well-being of the patient	KS.2, KS.4	1
Competences -	11 / student supplements knowledge in the field of new medicinal products,	KS.4, KS.8	1
Competences -	12 / student selects the medicinal product based on reliable knowledge	KS.4, KS.8	1
Competences -	13 / student is aware of the effects of decisions taken regarding the selection of the medicinal product	KS.1, KS.2	1
